BLUE-MAX

BLUE-MAX manhole and handhole gaskets, engineered to provide all the durability, resilience, and sealing properties of an asbestos gasket, but without the asbestos. A BLUE-MAX® gasket is manufactured from a proprietary tacky cloth of glass, synthetic fibers, and brass wire, impregnated with a blue elastomer compound. The material is cut and formed to the desired size and shape, then coated with a proprietary Teflon material per MIL SPEC T-27730A. The finished gasket is easily installed, delivers trouble free service, and does its part to reduce expensive boiler maintenance and downtime.

BLUE-MAX

Physical Properties

Service Temperature Max

500 ° F

Service Pressure Max

450 psi
