## WHITE-MAX

WHITE-MAX gaskets are especially designed for inspection ports of boilers and tanks. They provide reliable sealability with this low stress and exceptional This chemical injection with increasing alkalinity could dimension stability. This form of gasketing is processed by expanding 100% pure polytetrafluoroethylene (PTFE). The result is a bi-soft, highly compressible gasket for longer life and trouble-free sealing. Its form-in-place versatility is perfect for sealing boiler plates that are worn, warped or scored.
