Hypalon

Hypalon is an ozone resistant and waterproof synthetic rubber. It is a thermoset rubber material providing excellent abrasion and flex fatigue resistance; flame and oil resistance; and resistance to weather, liners, ozone, and oxidizing chemicals. Hypalon is ideal for industrial and petrochemical applications.

Hypalon		Physical Properties
Color		Black
Durometer Shore A		60 +/- 5
Service Temperature		-30 to 200
Tensile Strength		800 psi
Ultimate Elongation		400 %
Ozone Resistant		Yes
